Our Story

Founded on the east coast of Scotland, Keela International is proud to be a British manufacturer of high quality outdoor clothing.

The British weather creates the perfect environment for our rigorous testing. We don’t just test our garments in high-tech lab conditions, we put them out on the hills with real people. As a result of our ongoing development Keela has won many awards, including the Queen’s Award for Enterprise: Innovation.

With our approach to innovation, testing and technical advances, we focus on protection, so you can focus on adventure.
Our Core Values

We pride ourselves on our approach to design and research, and constantly work to improve according to our three core beliefs: Innovation (IQT), Sustainability and Community.

Innovation, Quality, Technology (IQT) – Our team uses experience built from decades of providing garments to Emergency Services and Mountain Rescue, combined with cutting-edge technology to design the next generation of Keela garments.

Sustainability – We are the first waterproof clothing manufacturer in the UK to sign up to the Sustainable Clothing Action Plan (SCAP) and together we are working to ensure our garments are as sustainable as possible.

Community – We work in partnership with initiatives such as Britain on Foot, as well as rescue teams, to encourage people to get involved in the great outdoors.

CONTENTS

06 Extreme
The toughest, most durable jackets in the range
10 Trek & Country
Jackets for the hills, valleys and everyday wear
12 Multi-sport
Versatile gear for fast-moving adventurers
16 Softshell
Breathable, windproof year-round protection
20 Thermal
For when extra warmth and insulation is required
26 Baselayers
Fast-wicking, fast-drying next-to-skin comfort
30 Trousers
Mountaineering salopettes to everyday rainwear
36 Travel
Stylish crossover kit for the long or short haul
42 Kids
Weather-beating clothing for children of all ages
46 Sizing & Tech

System Dual Protection (SDP)

The Queen’s Award for Enterprise: Innovation is one of the UK’s most prestigious awards, recognising outstanding achievement in the field of international trade, innovation and sustainable development.

Keela International is very proud to have received the award in 2008 in recognition of its outstanding System Dual Protection (SDP) — the world’s only waterproof performance clothing technology that manages inner condensation in wet and cold conditions.

SDP is a unique double-layer fabric system with an air gap. The tough, durable outer layer ensures it can handle wear and tear, while a lightweight inner layer offers comfort and creates the air gap to build up warmth. SDP is 100% waterproof, breathable, warm and reduces inner condensation to keep the wearer protected.

Originally developed for use in military applications in the most testing of conditions, System Dual Protection has gone on to become integral to Keela’s product development in apparel supplied to Tactical Forces, Mountain Rescue Teams and the Emergency Services, who all demand technical clothing that performs under pressure – just as they themselves do.

SDP is also widely used by Keela in its outdoor clothing range and has gone on to conquer some of the world’s toughest mountain peaks and survive some of the harshest weather on the planet.

In short, System Dual Protection provides unrivalled waterproof protection and comfort in any conditions.

Moisture build-up caused by condensation from your body in cold or damp conditions can be a real problem, regardless of how ‘breathable’ your jacket is claimed to be.

If you use a waterproof jacket frequently and are out in all weathers you will no doubt have experienced this physical phenomenon. Although it may look and feel as if your jacket is letting in water, the moisture is in fact caused by condensation which builds up inside your jacket when it rains or when the temperature is around 14°C or below.

No matter how breathable your jacket might be, there is no breathability (or very little) in cold or damp conditions.

Breathability standard tests generally take place in dry conditions of 21°C or above. When temperatures are lower and humidity levels much higher, it’s difficult to quantify or substantiate breathability levels in most outdoor clothing. Since most outdoor activities do indeed take place in cold and damp conditions it’s hard to be sure how effective this so called breathability really is. Research by the University of Leeds has found that no fabric is breathable in cold and wet conditions after 60 minutes.
How does Keela’s SDP system work?

Keela uses an outer fabric, which is coated or laminated with a breathable membrane, and combines it with a mesh lining which has a high wicking hydrophilic (water loving) membrane laminated to it. These two layers of fabric create an air gap providing a natural thermal barrier, protecting against heat loss and reducing the need for bulky layers.

The hydrophilic membrane rapidly transports moisture (sweat and condensation) away from the body, keeping you dry and comfortable, even in the rain. The combination of the air gap and wicking process regulates body temperature, minimising overheating when active and shivering during inactive periods, keeping you comfortable and safe.

Keela’s System Dual Protection is unique and unrivalled when it comes to waterproofing and comfort in any conditions. It remains the ‘go to’ technology for many people working outdoors or taking part in activities in cold and wet conditions.

It’s a technology that Keela is justifiably proud of and the Queens Award for Enterprise: Innovation only goes to underline its importance for so many of these users across the world.
“The jacket of choice for a number of mountain rescue teams in the UK. With all the essential features you’d expect on any serious bit of mountain wear, the Munro feels just ‘right’ when you’re wearing it”
Keela’s flagship jacket is capable of combating the toughest conditions imaginable. It has helped conquer the highest mountains on the planet and is used by Mountain Rescue Teams, Tactical Forces and expedition teams worldwide. Packed with features, robust and fashionable, you would be hard pushed to find another jacket on the market to match it.

- **Waterproof & windproof**
- **Highly breathable/wickable**
- **Condensation control**
- **Four-way adjustable rollaway hood with wired peak and one-handed drawcord volume adjuster**
- **Detachable inner snow skirt**

Kintyre Jacket 00610

A longer cut and classic styling make the Kintyre a popular choice for easy hikes and country walking. A fleece can be zipped inside for added warmth.

Fabric: Rainlife 5000
Lining: Wickable mesh lining system
Sizes: XS-3XL

COLOURS
- Navy
- Red/Navy
- Black

- Waterproof, windproof & breathable
- Wired hood that rolls away into collar
- Internal zip for insertion of fleece (compatible with Keela’s Skye fleece jacket)
- Tabs at inner collar and cuffs for attachment of fleece
- Concealed OS map pocket

Lomond Jacket 00620

Sharing design features with the Kintyre but instead using soft-touch Innovation 7 fabric, the Lomond can be used for anything from fellside exploring to dog walking.

Fabric: Innovation 7
Lining: Wickable mesh lining system
Sizes: XS-3XL

COLOURS
- Green
- Navy

- Waterproof, windproof & breathable
- Soft touch outer fabric
- Wired peaked hood
- Internal zip for insertion of fleece (compatible with Keela’s Skye fleece jacket)
- Tabs at inner collar and cuffs for attachment of fleece
- Zipped side vents with stormflaps
- Concealed OS map pocket
- Two-way front zip with double stormflap
- Two zipped hand warmer pockets with stormflap
- One zipped chest pocket with storm flap
- Adjustable Velcro and elasticated cuffs
- Shockcord with cordlocks on hood, waist and hem
- Shockcord with cordlocks on hood
Falkland Jacket 00210

Traditional country styling meets modern design. Combining heritage fabric Ventile with our ADS Laminate makes the Falkland tough, durable and almost completely silent.

Fabric: Ventile
Lining: ADS Laminate
Sizes: XS-3XL

COLOURS
■ Olive

- Two front hip bellows pockets with stormflaps
- Two side pockets behind bellow pockets
- Pittards leather trim
- Two vertical chest pockets
- Concealed zipped OS map pocket
- Double stormflaps with snap closure
- Shockcord with cordlocks at hood, waist and hem
- Adjustable cuff with studs
- Adjustable waistband cord
- Chin guard

Ventile

Ventile® was the first truly effective all-weather fabric whose breathability performance remains unsurpassed.

Its secret lies in the uncoated and un laminated construction. The fabrics are 100% cotton, utilising the nest, long staple fibres, only found in the top 2% of the world’s crop. After gentle spinning and doubling, the yarn is woven into a very dense Oxford weave, using up to 30% more yarn than conventional woven fabrics.

The performance of Ventile® fabrics results from the properties of cotton fibres which expand when they come into contact with water. The combination of fibres, yarns and weave causes expansion in a uniform manner. This allows the interstices within the fabric to close up, preventing the further passage of water. The fabric therefore provides excellent protection against the wind, rain, snow and cold.
“Runners and cyclists will like the slim fit and low cut at the back... and the fabric helps keep out icy breezes”

BBC COUNTRYFILE MAGAZINE

“If you are looking for a great all-round jacket for multiple sports these jackets will perform for you”

RUN 247
A highly technical lightweight waterproof for cyclists and runners, made from Flylite Aqua fabric. The adjustable hood fits over helmets and reflective piping ensuring high visibility. The ladies’ version (Storm) combines a stylish tailored cut with great performance. Both jackets are ideal for fast-moving sports and take up little room in a rucksack.

**FEATURES (SAXON)**

“The Quantum has excellent ventilation. There’s extra comfort and performance too, courtesy of the two-way stretch fabric with a brushed inner lining”

CAMPING MAGAZINE
PrimaLoft® Gold
The Highest Performing Insulation

PrimaLoft® Gold is the highest performing insulation on the market for warmth, water resistance, softness and compressibility. PrimaLoft® Gold is an ultra-fine microfibre insulation that is warm, soft and lightweight, with better thermal properties – wet or dry – than all other insulations.

Ultra-fine fibres form tiny air pockets that trap body heat and keep the cold out. The result is immediate warmth without the bulk. PrimaLoft® Gold microfibres are engineered for permanent water resistance and create tight surface tension that resists moisture penetration – it’s an insulation that dries faster than goose down. These fibres mimic the compressibility of goose down and are breathable, allowing moisture vapour to be transported through the fibres and away from the skin.

Primaloft® Gold
Ultimate Performance, Warmth & Comfort

- Excellent thermal efficiency
- Dries faster than down
- Wind resistant
- Warm, soft & compressible as down
- Lightweight & breathable
- Superior water resistance
The Sherpa offers everything you could want in a thermal jacket: high performance, versatility, warmth and light weight. Made from PrimaLoft® Gold, it can be used as a midlayer or standalone jacket. With its water/wind resistant technology and unrestricted movement, this jacket appeals to extreme mountaineers and hillwalkers alike.

**FEATURES**
- PrimaLoft® Gold 100gsm fill
- Windproof and water resistant
- Sleeves zip off to form gilet
- Two-way main zip
- Zipped chest pocket
- Two zipped hip pockets
- Neck baffle with one-handed adjustment
- Velcro adjustable cuffs
- One-handed adjustable hem

“They are so comfortable! They hold the warmth required of a baselayer and the wicking fabric really comes to the fore”
A baselayer, by definition, is designed to sit next to the skin and help wick perspiration away from the body. It’s perhaps the most important clothing layer to get right. Keela’s ADS tops and bottoms have a close fit, are fast wicking, quick drying and have built-in UV protection. Suitable for hiking, biking, running and all outdoor sports.

**TECHNICAL PERFORMANCE**
- **QUICK DRY**

- Scooped back
- Reflective detail front and back
- Interactive zip to fit Boulder jacket
- Zetland Micro Fleece
- Scooped back
- Two zipped pockets
- Adjustable cuffs
- Adjustable hem
- Inner stormflap with chin guard

Boulder Trousers 52010

The Boulder Trousers complete our youth range and are designed to perform against the elements. A simple style, they’re waterproof, windproof and will keep kids warm and dry.

Fabric: Innovation 8
Sizes: 1/2, 3/4, 5/6, 7/8, 9/10, 11/12, 13/14 years

COLOURS
- Navy

- Waterproof
- Windproof
- Breathable
- Fully-taped seams
- Elasticated waist
- Stud adjusters at ankle
Boffin Hat 60830

Cosy and toasty – two words to describe the Keela Boffin Hat. Made from Zetland 100 fabric, providing easy care, non-pill and excellent thermal properties.

Fabric: Zetland 100
Colours: Black
Sizes: S-M, L-XL

Gaiters 60810

Designed for the toughest terrain, with a removable rubber strap that’s virtually indestructible.

Fabric: Innovation 5
Colours: Black
Sizes: M, L
- Elasticated at ankle
- Metal hook for attachment to boot
- Removable strap
- Drawcord/cord-lock
- Reinforced ripstop patches

Polacap 60860

Often copied, never bettered – the Polacap is both waterproof and breathable; the outer is made from Rainlife 5000 fabric with a warm Zetland liner. The wired peak protects the face from rain and sun glare, while ear guards keep the wind at bay.

Fabric: Rainlife 5000 & Zetland 100
Colours: Black
Sizes: M, L

Neck Gaiter 60850

A lightweight thermal neck warmer made from performance Zetland 100 fleece fabric, so it isn’t bulky and packs away easily. Long enough to pull up over your nose and ears while still keeping your neck covered.

Fabric: Zetland 100
Colours: Black, Orange, Snow, Blue
Sizes: one size
- Warm and comfortable
- Easy to pack away
- Retains warmth
- Quick dry
- Breathable

Expedition Sock with Primaloft Fibres 60250

Our fully-cushioned, top-of-the-range sock is ideal for the harshest of conditions. The PrimaLoft® Silver and Merino Wool blends comfort with enhanced warmth and performance, wicking moisture away from the skin to keep feet dry and comfortable.

Fabric: 29% PrimaLoft® Silver yarn, 29% Merino Wool, 20% Isofil® Polypropylene, 8% Nylon, 5% Cordura® Polyester, 2% Lycra® Elastane
Colour: Carbon
Sizes: S (3.5-6), M (6.5-9), L (9.5-12)

Sherpa Hood 60910

The PrimaLoft® Hood is designed as an add-on for our popular Sherpa jacket, although it is nevertheless suitable for use with a variety of jackets. The Flylite outer fabric means it’s windproof and resistant to water, while the PrimaLoft® insulation gives an impressive warmth to weight ratio. This is no simple packable hood, this is compact innovation.

Fabric: Flylite, PrimaLoft®
Colours: Black
Sizes: S/M, L/XL
Keela & the Outdoors

At Keela we love the outdoors, so as well as working with rescue teams to keep people safe we have also become the first waterproof clothing manufacturer in the UK to sign up to the Sustainable Clothing Action Plan (SCAP).

SUSTAINABLE CLOTHING ACTION PLAN
We are committed to reducing waste and increasing sustainability through garment and process improvements, and believe it is important to work together to keep our environment beautiful.

LOVE YOUR CLOTHES (LYC)
Want to get involved? Check out LYC, run by SCAP – it has plenty of information on extending the life of your clothing. • loveyourclothes.org.uk

Keela & Sponsorship

At Keela we always aim to do what we can to help the community and believe this is a key part of our business.

As part of our approach to work in the community, we have helped with a number of local, national and international causes, sponsored events and individuals.
Because of the limitations of printing ink in matching colours the colour swatches and garments shown throughout this catalogue may not match the colourways of purchased products and are provided solely as a guide. Additionally features may vary through garment versions. No responsibility will be accepted by Keela, its agents or suppliers for decisions made on such a basis.

Innovation
One of the key elements of our System Dual Protection range, Innovation fabric is completely waterproof and windproof. As a breathable fabric with a hydrophilic coating, Innovation fabrics offer protection even in the harshest conditions. Innovation 5 is used in our award-winning Men's and Ladies' Munro Jackets; Innovation 8 with built-in ripstop is used in our Cumulus MRT jacket.

Innovation XL
Used in our waterproof fleece range, Innovation XL provides warmth and comfort with the added benefit of being 100% waterproof and windproof.

ProStretch
Combining a water and windproof, breathable fabric with a four-way stretch movement, ProStretch fabric is perfect for high activity sports where freedom of movement is essential. A softshell outer gives maximum comfort while maintaining protection from the elements.

Blizzard 3-Layer
Blizzard 3-layer fabric is lightweight and completely waterproof and windproof, offering exceptional protection from the elements. With the use of capillary technology the fabric is breathable and very hard-wearing, making it ideal for extreme sports where weight and durability are important.

Ventile
Ventile is densely woven from 100% cotton using the world's finest long staple fibre. It is not coated or laminated, yet the combination of the dense weave and the swelling properties of the fibres when wet provide excellent weatherproofing. Ventile is an entirely natural product that offers a unique level of comfort, look and feel as well as being windproof, highly breathable, very durable and quiet.

KEELA FABRIC TECHNOLOGY
Rainlife
Rainlife 2000 uses a lightweight outer nylon with a hydrophilic coating, which makes the ideal outer skin for multi-activity use. Rainlife 5000 uses a texturised outer with a waterproof hydrophilic coating; this delivers improved breathability and waterproofing for fantastic all-round outdoor performance.

Flylite Series
The Flylite fabric range has been developed to protect against the elements while adding minimal weight. These ultralight fabrics are tough, wicking, windproof and water-resistant, with a great strength-to-weight ratio.

Flylite Ripstop
Flylite Ripstop is ideal where something a little more durable is needed. With ripstop construction this 100% nylon fabric is hardwearing, even in the harshest terrain. Ideal for a variety of applications from trail running to mountaineering.

Flylite Ultra
The ultimate in windstopper fabric, our Flylite Ultra is water-resistant, wickable, breathable and has a soft handle which feels great next to the skin.

Flylite Aqua
When waterproof technology is needed nothing beats our Flylite Aqua. Waterproof to 10,000mm and with a weight of just 59gsm this fabric is strong and versatile, ideal for a multitude of sports.

Zetland
The Zetland range is the ideal fleece fabric for any outdoor activity. Soft to touch yet hardwearing, this 100% polyester fabric is tightly knitted, providing excellent thermal properties and insulation. All the fabrics within this range are non-pill, easy-care, high wicking and quick drying.

Zetland 100
Our Zetland 100 is a durable mid-weight fleece perfect for use in outer layer garments. When combined with our Innovation XL liner and DWR coating, Zetland 100 is transformed into a waterproof, windproof fabric that will withstand the most testing of conditions.

Zetland 200
A heavier weight fleece ideal for midlayers and outer layers when conditions demand something warmer. With excellent warmth-to-weight ratio Zetland 200 is great for extreme conditions.

Zetland Micro
The lightest fabric in the Zetland range, Zetland Micro has a soft handle which makes it perfect as a midlayer or a thermal layer worn next to the skin.
